

Pacnet Dedicated Hosted Exchange

Secure Messaging Environment

Majority of today's businesses rely on Microsoft Exchange environment to support myriads of productivity enhancing applications. However, some companies find it hard to justify its total cost of ownership, especially when it entails dedicated IT personnel to manage software updates and hardware maintenance, which translates to higher operating costs. Other issues such as reliability and performance concerns may arise as your infrastructure and security resilience may not be sufficiently catered for in an in-house environment.

Pacnet Dedicated Hosted Exchange helps you reap the benefits of advanced Exchange email messaging system with a hosting service that allows you customise, build, host and manage your email server. As a hosted and managed service, Pacnet Dedicated Hosted Exchange frees up your time and resources as you leave the daily operations, management and support in our hands. And now, we offer the latest Microsoft Exchange 2007 so you'll enjoy more functions than before.

Microsoft Dedicated Hosted Exchange offers

- Always-synced email, files, calendars and contacts
- Connectivity with mobile devices
- Shared calendars that let colleagues view one another's availability to schedule or rearrange meetings, book conference rooms and plan projects
- Shared task lists that allow "to-do" lists to be created, assigned and shared with team members
- Shared contacts which guarantee customers' contact details will never be lost or misplaced

You can leave all your concerns behind with Pacnet Dedicated Hosted Exchange. With our solutions, you will enjoy the same enterprise strength messaging system that Fortune 500 companies possess, at a lower cost and minimal capital outlay required.

Leverage Pacnet's expertise in providing mail services to over 250,000 users in Singapore for a business messaging system that truly strengthens your operations.
