

Cost Effective Data Warehousing Scalable Platform

SINGAPORE

Pacnet MS SQL Hosting Service

IT SOLUTIONS AND HOSTING

Business data is an enterprises' most valuable asset. How you store and update these assets and make them available when needed is crucial to your business growth. Efficient data warehousing starts with investment in tried and tested database management solution and dedicated personnel to manage your growing requirements. But for a growing business, a hosted solution can deliver the same results.

Pacnet's MS SQL Hosting service provides you with high-end database hosting solution to ensure the scalability and reliability of your business critical data without the need to incur huge deployment and licensing cost. Providing you with the latest database application based on Microsoft SQL Server 2005, Pacnet allows you to fully integrate this highly scalable data warehousing solution in your IT infrastructure.

Pacnet will provide all necessary backups and services to ensure maximum uptime in connectivity. With our quality service and dedicated technical support, you can rest assured your website and applications will be up and running 24/7.

PACNET HOSTED MS SQL SERVICE PROVIDES YOU

- Dependable database management system using Microsoft MS SQL 2005 database and 50MB hard disk space and database hosting on Windows Server 2008 R2 (x64)
- Maintenance and upgrade of database server by Pacnet team of experts
- Ensured performance with reliable round-the-clock monitoring of Internet connection to your server
- Direct connection to Pacnet's Internet backbone
- World-class data centre with state-of-the-art UPS and back-up generator
