## Pacnet MailGuard Services

### MANAGED SERVICES

**Spam and email viruses have become increasingly difficult to control, especially when you don't have dedicated manpower to maintain security of your email environment. Even if you have the resources to invest in advance anti spam and antivirus solutions, you would rather direct your energies into growing your business than spend time clearing junk mails.**

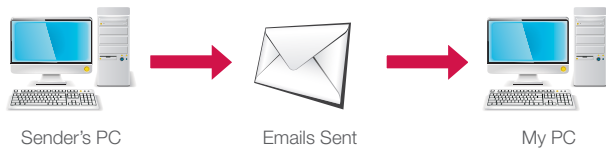

Pacnet offers you a cost effective email security solution that can integrate into their existing email services, ensuring security of your email environment. With Pacnet MailGuard, you get double protection from malwares while keeping your mailbox free of spam.

### PACNET MAILGUARD ANTIVIRUS FEATURES

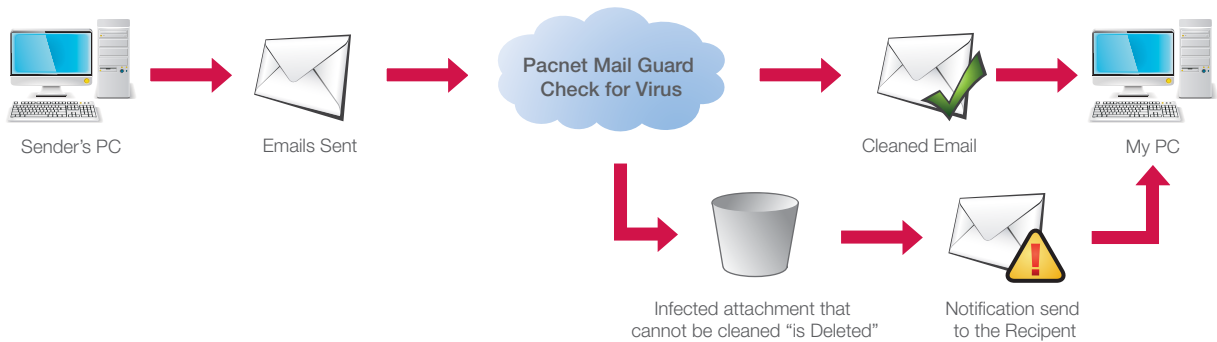

- Round the clock protection against email viruses
- Secure, offsite antivirus server with effortless deployment and no additional software required
- Full integration with your existing email system without any additional configuration
- Automatic update of new virus strains
- 24-Hour technical support

## Powerful Protection Proactive Control

### Without Mail Guard Anti-Virus

### With Mail Guard Anti-Virus

### Pacnet Mail Guard Anti Spam Features

- **Hassle-free deployment** – no hardware or software required
- **First Level Scanning** – scans and filters e-mails on your Inbox and transfers questionable emails to a web-based quarantine Bulk Mail folder
- **Mail Review** – Reviews quarantined mails in the Bulk Mail folder for reclassification and deletion
- **Email Address Specification** – allows you to administer your own Black List/Junk List" (Unsolicited Email) and "White List/Buddy List (Legitimate email)
- **Daily Email Summary** – Lets you view all emails in the "Bulk Mails" folder to quickly identify less critical emails
