

Powerful Web Presence One-Stop Solution

SINGAPORE

Pacnet Web Hosting (PacWeb Pro)

IT SOLUTIONS AND HOSTING

**Web presence has become a necessity
in today's business environment.**

**However, building, updating and
monitoring your corporate website
could be taxing, especially with limited
manpower and web development and
maintenance skills.**

**A website helps companies stay ahead
of the competition and add a new
dimension to their business. The web
keeps you open for business 24 hours
a day, 365 days a year, allowing you to
reach out to the global audience and
facilitate communication between you,
your customers and business partners.**

Pacnet's Corporate Web Hosting service provides you a cost-effective solution in building web presence without having to invest in dedicated server. As we take priority in quality of service, state-of-the-art equipment is used for optimum efficiency and stability. A comprehensive range of services are also available or can be customised to your business needs to enhance your corporate identity.

Why Pacnet's Web Hosting Service?

With PacWeb Pro Web Hosting service, you can directly tap Pacnet's diversified Internet backbone, multiple international circuit and advanced routing technology. Being a first-tier Internet Service Provider, Pacnet provides direct connection to the Internet with minimal Internet traffic congestion, which is common in second-tier providers or 3rd party resellers. As a leader in Internet services, the best networking and hosting solutions is assured for webmasters, web developers, and new Internet start-ups.

Pacnet uses quality state-of-the-art equipment to ensure stability and continuous website connectivity supported by our very own professional and efficient Network Operations Centre.

Carrier-Grade Facilities Maximum Protection

Establish a corporate presence on the Internet with Pacnet's PacWeb Pro services. Pacnet helps to promote the corporate identity by providing a unique Internet Web address of the corporate Web sites on a shared Web server.

PacWeb Pro is highly recommended for the small to medium businesses looking for a cost-effective solution with no compromise on quality and features. In addition, a directory for web contents will be allocated on a shared server to facilitate Internet users to access your corporate information.

With a world-class Data Centre, state-of-the-art UPS and back-up generator, Pacnet will further enhance your corporate identity on the Internet. A 24-hour direct connection to Pacnet's backbone will provide the reliability and high bandwidth to ensure efficiency when you market your products, inform people about your company's events or even provide online customer support through your corporate website.
